

# ATTENTION: CONNECTICUT MANUFACTURERS

## The Manufacturing Careers Program\*

---

The Manufacturing Careers Program is designed to help employers pre-qualify job seekers with a manufacturing education by validating foundational skills and technical skills required for manufacturing employment. In addition, the program can provide subsidies for internships and hiring.

- Do you currently have **ENTRY LEVEL** job openings in manufacturing?
- Does your company hire employees from the Hartford and Enfield labor markets?
- Are you interested in hiring incentives that would help mitigate financial risks associated with a new hire?
